

# System Dominance

'Know what your spectrum is doing 24/7'

LS telcom is widely recognised as a global leader in spectrum system integration with a proven track recording delivering customers' spectrum requirements in hardware, software, system integration and electromagnetic domain training.

LS telcom have highly experienced personnel with a thorough knowledge of spectrum concepts, system development and how these capabilities fit into the Commander's operational requirements. LS telcom backs up its technical expertise with military focussed training courses and consultancy.

## System Design

- Fully scalable system design from 'single box' to nationwide networked systems
- Compliance to all relevant Civil and Military regulations (ITU, ISO, MIL-Std)
- Turnkey solutions from concept to full operational capability, to include through life maintenance and support
- Interfacing common data exchange
- Fixed, Mobile (Vehicle, Naval, Air and UAV) mounted capabilities

## Hardware Integration

- Independent of supplier / mixture of different vendors possible
- Updating / upgrading of legacy hardware/systems
- RF monitoring, ESM and ECM systems

## Software / Data- Integration

- Dynamic data management
- Interfacing to MONITORplus with powerful data presentations facilities
- Automated backup-Restore Facilities
- Automated / Optimised establishing of communication links

## Turnkey-Services

- Project management / Project integration
- Operational maintenance training
- Operational support and mentoring
- Through life support of systems.
